

Our Peelboards are the result of intensive research work. Our product offers unique state-of-the-art technology connecting the ABS surfaces and the metal core.

- The structure of the ABS plastic surface is ideal for proofing products that otherwise adhere strongly to surfaces.
- Unlike with cloths, there is no mould growth. The Peelboards are waterproof and can be washed. Moisture does not penetrate the individual components.
- Suitable for food, also for organic products

PRODUCED BY EVERBAKE

Long service life

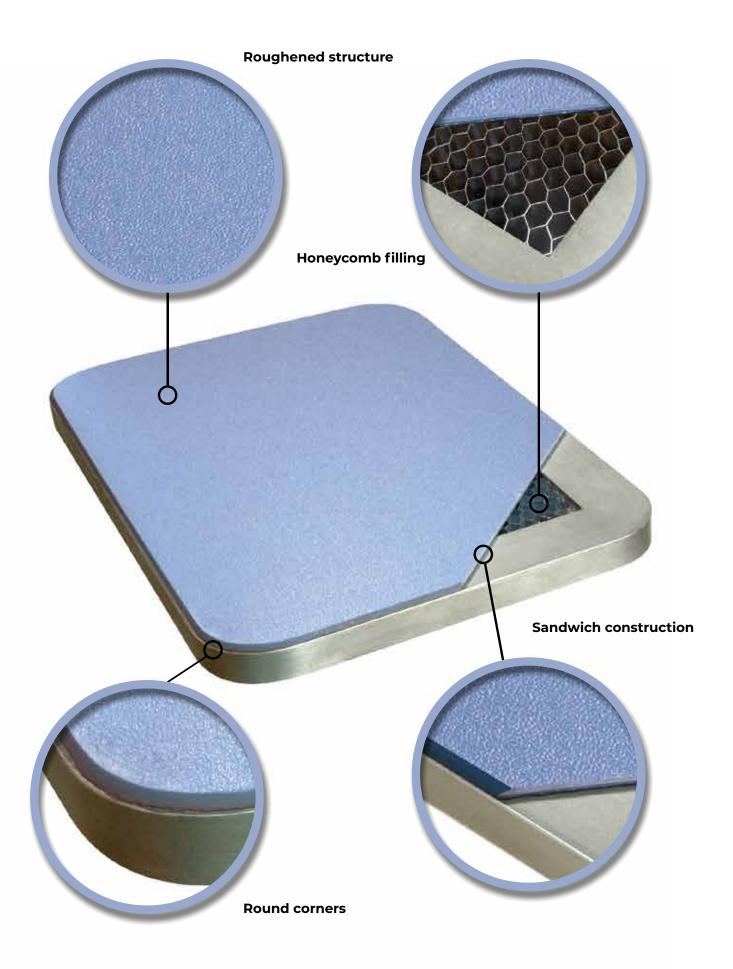

EverBake Peelboards are available in various designs:

- · Breadth dimension up to 1800mm
- · Profile heights 14 or 19 mm
- Rounded, cut off or 90° corners

Standard dimensions:

Dimensions LxW	Profile heights	Coating
600x400mm	14 / 19 mm	roughened
580x780mm	14 / 19 mm	roughened
600x800mm	14 / 19 mm	roughened
580x980mm	14 / 19 mm	roughened

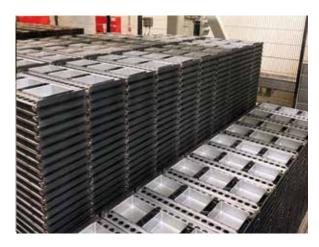

BREAD PANS

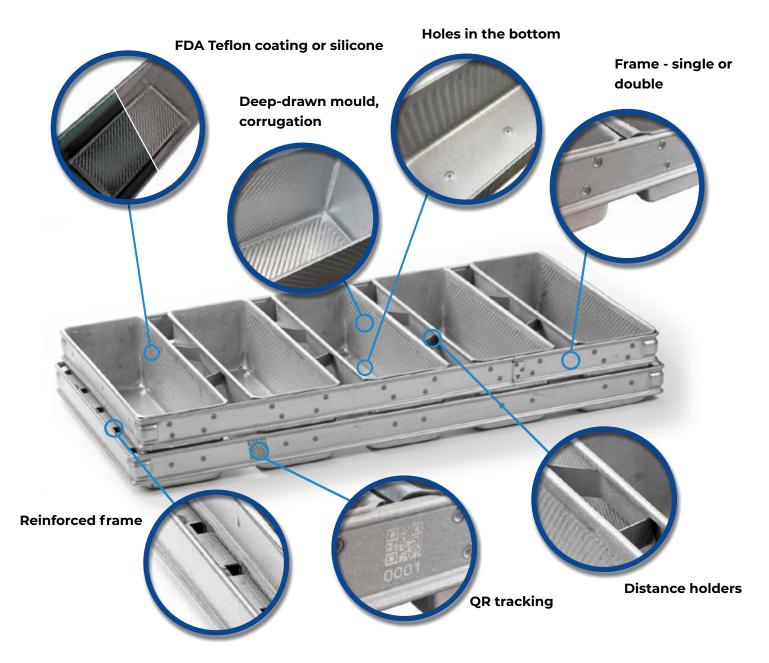

- Deep drawn pans or folded pans
- Edge bumper
- Robot handle
- Single / double frame
- Lids in different executions
 (sliding, locked). Stacking system
- Closed / project frame
- Supporting bridges
- Distance holders
- Stacking possibility
- Coding tracking

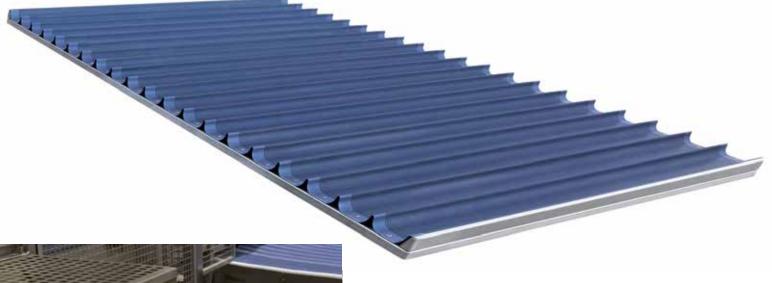

Robot handle

Distance - side bumpers

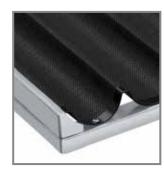

BAGUETTE TRAYS

OTHER POSSIBLE EXECUTIONS

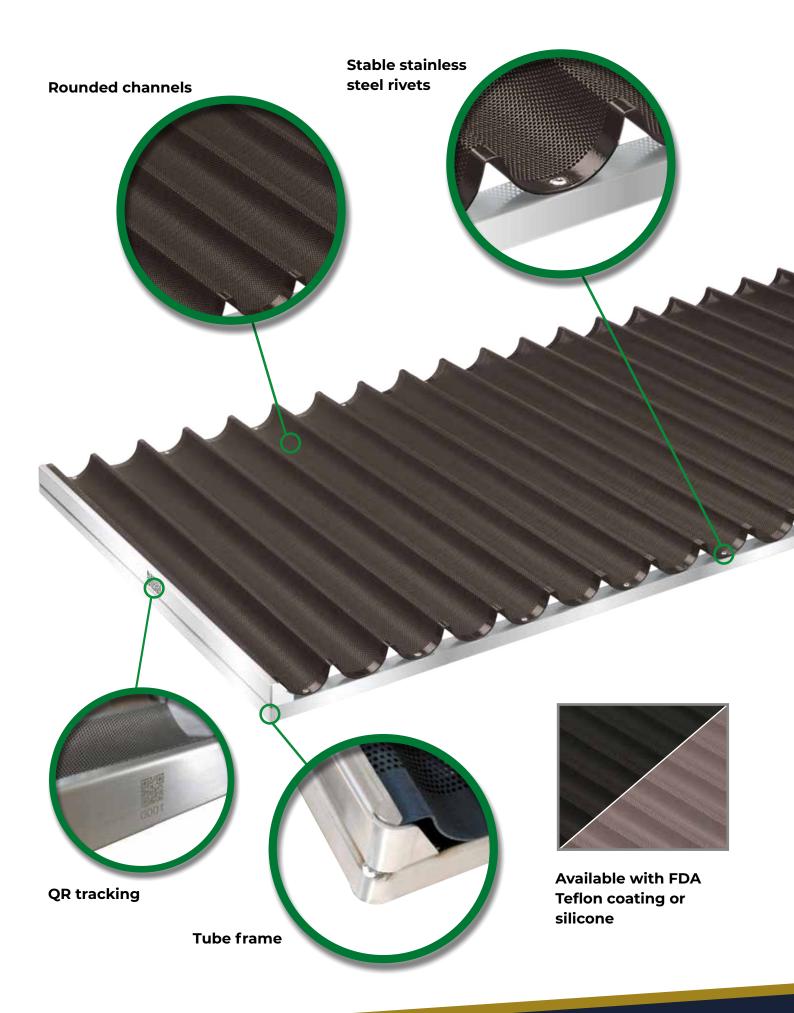

Frame execution

- Stainless steel frames
- For automatic lines
 (Mecatherm)
- Perforated or non perforated inlays made out of aluminium
- · All sides smooth welded
- · Stainless steel rivets
- Bespoke sizing to suit individual line requirements
- Stacking possibility
- Coding tracking
- FDA Teflon coating of siliconen

PRODUCED BY EVERBAKE

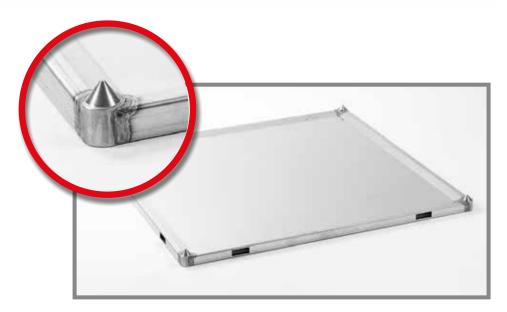

- Trays for automatic baking lines
- Aluminium insert sheet (Teflon coating or silicone is possible)
- · Stainless steel frames
- Flat tray from 800x600mm to 2400x800mm

- Alusteel or chrome steel trays for automatic lines
- FDA Teflon coating or silicone possible
- Stackable execution

OUR ADVANTAGES

- Completely adapted to your requirements and suitable for automation
- Samples to verify and confirm technical specifications
- FDA Teflon coatings and silicone are certified for food contact

COATINGS

GENERAL PRODUCT INFORMATION

EverBake offers a wide range of coating for the manufacture of bakery-related products. By a constant urge to innovate, EverBake is continually looking for products that can improve the efficiency of bakeries. In order to be able to offer the best coating for every application and budget. These coatings have excellent release properties, so that greasing of baking forms is

unnecessary in almost all cases. The excellent release properties, high heat resistance and excellent wear resistance result in a long life. Working closely with our clients, we determine which coating - in combination with the available budget – will be the most suitable for their application.

PRODUCED BY EVERBAKE

All sorts of bakeware

- Higher heat resistance
- Longer life
- Durability
- High quality
- Excellent non-stick release properties
- Meet stringent requirements of the Food & Consumer
 Product Safety Authority

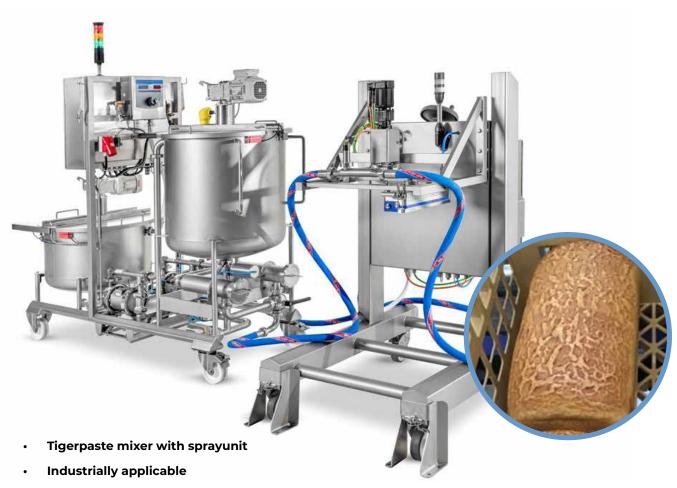

Strapped bread pan for tin bread

ZELA3000 TIGERPASTE MIXER

- · Easy to clean
- Tank capacity of 165 liters
- Storage tank of 270 liters

PRODUCED BY EVERBAKE

ZELA2100 GREASING MACHINE

- · Integrated in automatic line production
- Airmix system
- · Stainless steel housing
- Spray unit is adjustable in height and because of the mobile U-frame in can be placed anywhere in the line
- · Automatic filling system (optional)

With filterunit

Accurate and even spray pattern

ZELA EGG/YOLK AND GLACE MACHINE

- Rinsing function
- Easy to clean
- Fits into any production process
